

Submitter: David Brown

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

I am against this bill. It is not good thinking to ban the fossil fuel that has helped reduce greenhouse emissions over the last number of years. Move toward green energy but don't cut off what we need now while that technology is being developed. Wind and solar are not environmentally friendly under current technology and don't produce enough electricity for the needs of the state.
