

Submitter: Dan McFarlane

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

This bill would put an extra burden on those that live in Oregon I dont know of anything currently that does not get moved by trucks. Until there is an alternative fuel and supplies put into place this is insane thinking. why dont we spend the money that we waste with this type of nonsense to real use like doing away with the homeless. How I dont know but it would make more sense then to eliminate a tried and true system that is currently in place
