

Supporting Survivors • Strengthening Communities • Empowering Change

To whom it my concern:

As a lifetime resident of Oregon, I have work with many families dealing with chronic homelessness. Homelessness due to domestic violence, addiction, mental illness, lack of affordable housing and resources, these people need all the support they can get. Without this funding our most vulnerable people will suffer. Making them even more susceptible to harm.

These funds would make a positive impact on people by breaking barriers that stand in the way of safety and security. Everyone deserves a safe place to call home.

Best wishes,
