

Submitter: Roy Burchett

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

Diesel powered trucks are essential to all industries and consumer good in this entire state. This idea of banning them is lacking in foresight on what it will do to the consumer goods markets and all industries. This is essentially putting the cart before the horse. More development on capacity, range, power grid, and infrastructure for alternative fuel types are the correct steps to take BEFORE a ban on this can even be considered. The timeframe for this to take effect is irrelevant as manufacturers are still addressing and developing diesel alternatives that are cost effective.
