

Submitter: Judith Bruce

On Behalf Of:

Committee: Joint Committee On Semiconductors

Measure: SB4

I oppose this legislation for many reasons: grossly inadequate infrastructure which includes roads as well as the Boone Bridge, the current existence of developable land within the UGB and the destruction of the Rural Reserve. We all suffered through the creation of those boundaries and this is a slippery slope to their destruction.

Please do not let this legislation pass. Please be respectful of the residents of this area and do the right thing which is what you, as our representatives, are charged with doing.
