

Submitter: David Wall
On Behalf Of: Mr Oregon Opposes SB 220
Committee: Senate Committee On Natural Resources
Measure: SB220

I OPPOSE [SB 220].

To compel a 25% surcharge to the Geology and Mineral Industries, so Oregon can fund the development and operate, "The Electronic Permitting System Development Subaccount is established within the Geology and Mineral Industries Account" is "anti-business," it is a "Tax" and not anything but, a "Tax."

The State of Oregon wastes hundreds of millions if not a few billions of tax money on housing issues. Surely, Oregon could redirect some of the tax money, The Housing and Community Services Department routinely flushes down the toilet to create, "The Electronic Permitting System Development Subaccount is established within the Geology and Mineral Industries Account."

Impose a surcharge on the Geology and Mineral Industries to support [SB 220] while "The Housing and Community Services Department" wastes taxpayer money at alarming and grossly unsustainable rates? Please, Go Pound Salt!

David S. Wall
Mr. Oregon Concur.
