

Submitter: Viet Nguyen

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB422

I am a motorcyclist and have been riding for over ten years. I've first hand experience that lane splitting and filtering is safer for riders dealing with modern driving conditions that involve the majority of car drivers being distracted by devices while driving. Being able to travel between lanes allows riders to put themselves in the safest space and become more visible while navigating through traffic.
