

Submitter: Ellen Saunders

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Vote to support SB 85!! The degradation to the water, land and air by factory farms causes a toxic area that is almost irreversible. The cruelty to the animals in confinement is obvious. Small farms that use sustainable practice, outdoor roaming areas, rotate crops and animals, eliminate crowding and use waste recycling benefit the land, the community and provide healthy nutrition. GMO and Round Up and other farming chemicals are not only poisoning the land and its produce but the animals feed on GMO grains are unhealthy and should not be consumed.
