

Submitter: Bob Hannigan

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

This SB 85 will make it possible for many Oregon citizens to continue living and working in Oregon. It's obvious that we need to protect "small" in all its forms for a healthy planet and a health Oregon. Factory farm concentrations create contaminates we are unable to control as aptly demonstrated throughout the United States and even in Oregon with many of our existing large farms. Protect small farmers and say no to large factory farming in Oregon.
