

Submitter: Kathleen Boylan

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB546

Dear Chair Sollman, Vice Chair Findlay, and members of Senate Energy and Environment Committee,

I'm writing today on behalf of Consolidated Oregon Indivisible Network (COIN) to express strong support for SB 546. COIN is made up of Indivisible groups from across Oregon that collaborate to protect democracy and implement progressive values through voter outreach and education, campaigns and elections, holding our elected leaders accountable, and advocating for legislation that best reflects our values.

SB 546 is such a legislation. We support equitable access to healthy food ,water, and a toxic free environment for all Oregonians.

More toxic ingredients are put in cheaper products that are marketed towards teenage girls, and lower income and communities of color. These toxic ingredients include mercury in skin lighteners, and formaldehyde in hair straighteners and lotions. These toxins are known carcinogenic.

SB 546 would require that personal care product companies publish all ingredients of their products on their websites, and would require the phasing out of most toxic chemicals

Please join us in supporting SB 546
