

Submitter: Ray Garza

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

I work for ASAP Laboratories, I have been working with renewable fuel for over 10 years. I worked with Bill Zeller at the City of San Francisco to test and implement a switch over to renewable fuel. I tested hundreds of samples and saw that renewable does indeed burn much cleaner than traditional Diesel. There are really no comparison when comparing testing results, renewable without question seems to be a superior fuel. Please give me a call with any questions.
