

Submitter: Cynthia Enlow

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB488

SB 488 will close the regulatory loophole in Oregon's air quality laws. If passed, SB 488 will give the Department of Environmental Quality the authority to accurately assess how many tons of medical waste is burned annually at a trash incinerator facility and, if the specified weight limits are exceeded, apply the stricter emission limits required for medical waste incinerators under federal law.

Thank you.
