

Submitter: Jason Berg

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

It is my position that we simply do not have the proper infrastructure to support a massive shift from fossil fuels to any type of renewable fuels in the short amount of time mandated by former Gov. Brown's executive order. I am not opposed to phasing out fossil fuels per se. I am, however, opposed to these mandates being imposed in such a short order that transition cannot be achieved without severely disrupting supply chain requirements. Farmers, the trucking industry as a whole and any other industry that relies on diesel fuels and other fossil fuels. This is not a good or proper time to stress the system to this extent. Thank you for your time.
