

Submitter: Tim Hollister
On Behalf Of: GOP
Committee: Senate Committee On Energy and Environment
Measure: SB803

Oregon needs to be governed through the "people". My testimony may not mean a whole lot to anyone in Oregon Government but i can write enough to resemble many who i've spoken too. Oregon needs to be governed not dictated to! Oregon voters who are not represented in the two major populated regions will eventually erode due to so many terrible decisions being made since 2008. Already common sense has broke the super majority at the Capitol. And added a few conservative common sense seats in D.C. Governor Kotex hopefully will recognize that the Democrats have allowed crime to run unlawfully in our streets. The voters have no recourse but eventually this rule will lose out if it continues. Homeless being paid to live all over our cities and towns. Homeless being fed, clothed, given free healthcare, and a monthly credit cards is not solving the issue we voters are concerned about; safety and unhealthful residents staggering around businesses and parks. Open Drug use, drug Needles, fecal matter, public urination, trash all over, and even homeless threatening people passing by "their" territory. So voting on measures of GASOLINE TAXES (and issues to grab more money that won't be used appropriately) seems so useless and distracting from the real issues. Human dignity!! Where the h**l is the TRILLIONS for the Biden BBB bill for infrastructure across America? Political Officials ALWAYS seem to get BILLIONS and nothing seems to change for the homelessness!! STOP ?? THE INSANE spending and then ALWAYS end up GRABBING more of citizen wages ANYWAY! The humans living on our streets need hospitalization or health evaluations and FORCED into rehabilitation. If they do not want help STOP ENABLING THEM by saying "sorry no more substance". Americans are aware of the corruption in all 50 States. Not every city, County, or State official is Corrupted. But many of them are threatened or targeted (Swatted) to silence them. Explain-testifying will be career ending for many Officials if saying something they know of is going on. Arizona Officials in the Election Committee (last week) heard testimony from a lady with a 3-year money laundering schemes being done throughout Calif and Arizona. This investigation is led by John Thaler now in secret protection due to evidence his team of 10 has uncovered going back to 1996. It's claimed and evidence he's uncovered shows that the Sinaloa Cartel are now in all 50 States involved in Government massive money laundering. Stop feeding the fraud by keeping the homeless on the streets by enabling them with Fentanyl and drugs mixed with this deadly instant killing drug! Fentanyl is now killing kids who are experimenting or anyone who is prescribed drugs ending up having fentanyl in it. America, including OREGON, is becoming a generational killing zone. Lets stop asking your citizens for money that is already available from the Biden's unsuccessful BBB program. TAKE ALL the homeless off the streets, offer them rehabilitation treatment, and giving many of them who need help so they can once again be part of

MAGA. You'll have more taxable citizens, safer schools, safer parks, and cleaner streets. I will end this by suggesting one more important issue: destroy the voting software, the voting machines, and go back to voting like we use to vote: at a voting station standing in a line and just ONE DAY! No mail-in ballots and no drop off boxes. And every person providing a authentic birth certificate and or valid ID that proves the person voting is the person of record. No illegals until a certified USA Citizen via the normal way of filing for citizenship. Good day Tim Hollister
