

Submitter: Todd Vaughn

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Agriculture has used various forms of enclosures to protect, feed, fatten, milk and raise livestock from the beginning of human-history. The fact that these animals do not roam freely does not mean that they are receiving inhumane treatment. The same people who are promoting legislation like this are perfectly fine with third-term abortions for human-babies. It is absolute hypocrisy.

Food costs have been skyrocketing as it is. This law would push the cost of protein beyond reach for many Oregonians, and it would break many farmers.
