

Submitter: Pat Young

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

I strongly object to SB 803. It will not be a benefit to Oregon industries and will result in a loss of jobs and State revenue. I see this as another short sightedness by government with no real practical knowledge of the hardship this will cause Oregonians who haul freight, deliver food to grocery stores, run equipment to build roads, fish in our the ocean or log our forests to build houses.... As usual no common sense in government!
