

Submitter: Bryan Allan

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I operate a family farm in Gales Creek, OR. I care deeply about the environment, water quality, food affordability and supply chains. Concentrated industrial activity on the scale of CAFOs have deep and persistent impacts on rural communities, farmers, watersheds and consumer prices do to concentration of production and corporate profiteering. A moratorium that allows normal farming practices while we study industrial CAFOs is in the best interests of my family, rural communities, the environment and consumers. My family deeply cares about and support this bill.
