

Submitter: Bryan Schmidt

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Dear elected Official of our great State of Oregon!!

I have a small dairy and manage my manure responsibly, in a way appropriate to regenerative agriculture, which is better than organic, because it rebuilds the soil. Your proposed law will put an end to my project. Please become informed on the effects of this. Where did this bill originate from? Crazy stuff. Respectfully, Bryan Schmidt
