

Submitter: David Carlson
On Behalf Of: Residents
Committee: Joint Committee On Semiconductors
Measure: SB4

As a chair of the local HOA in Charbonneau, I have received numerous requests from our members to write in opposition to this bill. Currently the department of Transportation is planning to on making I-5 a toll road impacting our neighborhood negatively. Already they have made lane changes making driving less safe in many residences' opinion. Allowing a large manufacturing facility in the area will only exacerbate traffic impacts that are already a problem at many times. Traffic is commonly impeded due to exceedingly heavy traffic loads. A large manufacturing facility will only exacerbate the situation. Not to mention the negative impacts on schools, recreational activities, shopping and many other areas of life which will be less than desirable.

Many were under the opinion before the last election this was no longer an issue. Now that the elections are over, it appears this agenda (with this short comment period) the legislature is forcing a pet project not desired by the local residents.
