

Submitter: Aaron Starr  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure: SB854

Here is what you need to know: "Climate change" has been a "nebulous", non-objective "problem" for greedy tyrants to trick folks into voting them and obtaining power. It's a non-problem, and there is no "solution" expect keep giving tyrants power that have no solutions ... it's a brilliant business plan (kinda like gov't mandating vaccines if you are a vaccine maker... gravy train). Additionally, it used to be "global warming", but when the science could not prove that lie, they invested "climate change"; and lastly it's snowing the Los Angeles. How about we have lawmakers that actually work for the People for a change... this is garbage legislation. How about stopping Fentanyl from Mexico (it's actually chemically created in China), border invasion, Oregon's dismal public schools, CRT/BLM garbage (it's all Marxist satanic)... I could go on and on with things better spent with our resources.
