

Submitter: Penne Carter

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB3152

I believe that the state has not done the infrastructure to support electric only option to cutting of greenhouse gases. The research is not thorough and the impact to so many industries who rely on a more effective and cost efficient sources like natural gas have not been thought through. I feel the Oregon's focus is not for the betterment of Oregonians but the race for notoriety and federal dollars that only goes to the unsupported programs.
