

Submitter: Nikki Nafziger

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Factory farming is the biggest contributor to damaging the environment/climate change. It's not sustainable; waste/misuse of resources. And it's felony animal abuse, torture, endangerment and neglect. It's scientifically established that non human animals are sentient beings/thinking, feeling, aware, forming social bonds, experiencing love, joy, fear and anger and mourning losses. It's also against God's Teachings. He Commanded us to be Guardians of All of His Creations. BAN FACTORY FARMING!
