

Submitter: Connie Page

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Factory farms are harming our environment and ruining our water, along with the horrendous treatment of the animals. Factory farms are pushing out our small, individual farms and ranches - the people we know and trust to raise our food. We need to return to the positive American tradition of small farmers by supporting them ... not corporate farming. With the climate crisis and water becoming more of an issue every day, please do the right thing and support this bill.
