

Submitter: Denise Archer

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I support SB85. I want to support our small farmers. I want clean water and land. I want the animals we eat to be well-cared for before they die. I agree that industrial feed lots need to be studied and addressed before making any decision to proceed with them. We don't know what their impact will be to our small farmers, farmers markets, water, land and animal welfare. These are the cornerstone of what makes Oregon the state that it is and they should be protected. Thank you.
