

Submitter: Jason Nolin

On Behalf Of:

Committee: Joint Committee On Semiconductors

Measure: SB4

Oregon's urban growth boundaries are vital to the health and vitality of the state. Expanding beyond our UGBs irreversibly damages farm land and forests, and worsens traffic by expanding driving distances even further. Plenty of space already exists within UGBs — please do not hastily give away what makes Oregon great for some tech company looking for the cheapest place to exploit.
