

Submitter: Deborah Curtis  
On Behalf Of: myself  
Committee: Senate Committee On Natural Resources  
Measure: SB85

We all know that factory farming is unhealthy for animals, workers and the environment. Let's not create any more of them. Oregon could be at the forefront of a small is best movement for animal husbandry. Better for the short and long term health of animals with less disease and need for antibiotics, less pollution in our air and water supply. Large farms promise efficiency and jobs, but at a price for the animals, the community and the environment. That price is too high. If we must use animals for food, it is our responsibility to do so as humanely as possible. Please support SB 85. Thank you.
