

Submitter: John Saltveit

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

As taxpayers, we are tired of having to pay for the enormous pollution problem caused by factory farms. The workers get injured frequently too. They create an atmosphere of unhealthy animals. It's not just bad for the animals. We then eat unhealthy animals and animal products. Let's get back to a smaller number, so the manure is actually fertilizer, and so the animals don't suffer. Thank you.
