

Submitter: Kevin Jones

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

As a agriculture practitioner I am fully aware of what scale means to farms and society.

Reasonable limits are necessary in a time when corporate greed is common place and the earth's welfare means little to nothing to a board of executors carrying out there shareholders profit requirements.

Please rein in the the growing trend and help Oregon's natural treasures remain.

Thanks

Kevin
