

Submitter: Laura Lockhart
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

"I strongly oppose SB854. We need our children to receive an education that goes back to focusing on the basics of reading, writing, math and critical thinking. We do not need them to be indoctrinated into the questionable science of climate change. There is conflicting scientific evidence about the amount of impact, if any, humans have on the reality of climate change. Requiring all schools to side with a political stance on the unproven theory that climate change is caused by man and can be stopped by man is not education but indoctrination.
