

Submitter: Holly Harrington

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I am writing in support of SB 85. I support long-term food production in Oregon, especially as practiced by family-owned farms. We need to protect our resources from the unrestrained exploitation on massive scales by industrial food companies, who have no interest in the health, safety, and long-term viability of our local communities. This bill will prevent any more new mega developments from moving into Oregon. SB 85 maintains current "good-neighbor" farming laws, which saves farm resources for the use of existing farmers and ranchers who already do an outstanding job of stewarding the land here in Oregon.
