

Submitter: Frances Parr

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I want to protect Oregon from more ill effects of air, land and water pollution that would come from the harm of Factory Farms. We need to keep our land, air, and water clean from all the pollutants Factory Farms would dump into our now healthy and beautiful land. My family and i are vehemently opposed to this proposal. Please don't allow this to happen. Francie Parr
