

Submitter: Teresa Clausen

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

The passion rising from this bill creates the need and duty for all citizens to ask of you, our representatives, to be good stewards in handling this legislation. As Oregonians, we need to take our responsibility to preserve our lands, natural resources, lifestyles and our broad economic sphere very seriously, we could have dire unexpected consequences. Passing this bill gives our government time to cite, resource and compare results of legal procedures, health implications and generational losses experienced by other states. We have been fortunate to be granted public funds for mitigation of natural disasters to recover from the uncontrollable, we should be mindful to not create the need for more public funds due to fast and furious profits, that could cost all of Oregon irreparable damage.

Sincerely,
Teresa Clausen
