

Submitter: Tracy Buhler

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

my name is Tracy Buhler, my family has been raising broiler chickens since 1958. My father started poultry farming with a brood of 8000 birds. Today my family and I raise 150,000 birds six times a year. I am in my barns with my birds every day.. We are a family farm not a factory farm. Our facility is state of the art, and in compliance with all CAFO regulations. We are certified humane, we don't use hormones, we don't use antibiotics. Foster Farms is very sensitive to the wellness of the birds and the needs of the consumer. To insure the growth of the poultry industry and to keep costs down, for me as well as the consumer, please do not add any more restriction on our industry. Thank You.
