

Submitter: Todd Vaughn

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB582

My name is Todd Vaughn and I live in Tiller, Oregon.

SB 582 is just another expansion of Government. If the state needs to pay electricians to do work, then award the contracts based on the bid and the history and experience of the contractor. Allow all of us to do the same. Government control and over-sight that forces training programs and all of the rest of the stuff that this bill does simply makes everything more expensive while swelling already bloated government agencies. Quit wasting tax-payer money!
