

Submitter: Todd Vaughn

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

This Bill is intentional deceptive. The ultimate goal is to get rid of diesel fuel and that is simply ridiculous. Farmers and ranchers are already struggling to survive, and diesel is by far the best fuel to run their machinery. Stop destroying our food supply. Stop making it more difficult to profit from producing food. Consumers are paying the price, and inflation is already destroying families in Oregon! Quit with the lies!
