

Submitter: Gilbert Rush

On Behalf Of: SB85

Committee: Senate Committee On Natural Resources

Measure: SB85

My name is Gilbert Rush and i have lived and worked in the Scio area for 42 years. My concerns are water use and waste management. How will local water tables be effected, and i know from raising a flock of sheep how much work is involved to deal with the waste.

What recourse is there should surrounding property values drop due to the factory?

Air quality, odor?

This is short but i believe these are major issues.

thank you for the time,

Gilbert Rush
