

Submitter: Maile Anthopoulos

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Factory farms are polluting our air and water, taking up all the ground water from family farmers and citizens who live near them. The animals are treated terribly from the moment they're born to being taken to slaughter. The factory farms are crowding out the local family farms and not even paying their workers fair wages or decent accommodations. We do not need anymore factory farms in our state. Many of us prefer locally sourced/grown and organic food, besides!
