

Submitter: Angelita Sanchez  
On Behalf Of: 60000 working Oregonians  
Committee: Senate Committee On Natural Resources  
Measure: SB85

Chair Golden, Vice Chair Girod and members of the committee,

We understand the concerns of the local residents, in regards to Foster Farms chicken farms coming into their town. However this bill is overreaching and way too broad. It will negatively impact the entire agricultural industry, new and renewals. It is unfair and extreme. We can not afford to raise the cost of food nor can we afford to transport our food in to this state from out of state farms. We strongly OPPOSE this bill.

The constant attacks on animal food sources, low cost proteins, Oregon farmers and rural Oregon livelihoods is tiresome and divisive. This bill in and of itself has already divided the farming community. It needs to be scrapped. We need to be able to provide for our communities and our families. #Timberunity opposes more government over regulation, on our already overly regulated businesses.

No Farmers No Food.
