

Submitter: Abhishek Polavarapu
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

Dear members of the senate education committee, thank you for the opportunity to give testimony on Senate Bill 854. This bill is critical to ensuring that young people learn about the environment and how to protect and keep our future bright. This bill is close to me as I went to Rachel Carson Middle school which has a significant focus on preserving and learning about the environment. This experience taught me the importance of learning about the environment by teaching me ways individuals can preserve the environment. Your action on SB 854 will help address this by allowing schools to implement climate change programs which can help educate students on how to reduce the effects of climate change and also reduce them.]
