

Submitter: Michael Mosee  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure: SB854

Oregon education does not need to be in the business of selectively mandating climate education according to who?? When our kids are already so far behind on the fundamentals of math & science. Redirect your focus on the basics & while you're at it implement studying the United States Constitution & Bill of Rights as mandatory in all school grades curriculums.

Sincerely,  
Mike & Ramona Mosee  
Eagle Point, Oregon
