On Behalf Of:

Committee: House Committee On Education

Measure: HB3068

I strongly support passage of HB 3068. Some youth aren't able to navigate public schools well, and some public schools are poor quality, and toxic for some. In addition since no mastery of anything is required to graduate in Oregon now, a GED certificate at least demonstrates significant achievement and knowledge. Why not provide this option to some students who could pursue the GED instead of dropping out of school altogether?
