Re: Support for SB 85—the factory farm moratorium bill

Dear Chair Golden, and Members of the Senate Natural Resources Committee,

My name is cliff myers and i want to say, on behalf of myself and my family; Factory farms fuel climate change by releasing harmful and dangerous greenhouse gas emissions such as methane and nitrous oxide. Animals in factory farms suffer immensely, enduring extreme stress and intensive confinement that causes physiological and psychological trauma. In addition to multiple health reasons; resistance to anti-biotics is a dangerous risk because of these types of facilities. thank you for your time. -the myers family- deer island, oregon
