

Submitter: Martin Pawelek

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I oppose SB 85.

Are you purposefully trying to destroy Oregon by suggesting something so devastating or are you so naïve and brainwashed into believing that cattle or any livestock for that matter are a threat to our climate? The real threat to our climate is having legislators who can't even predict the stock market try and claim that you can save the planet by eliminating the very thing that is valuable for survival.

The shoes you wear, the home you live in, the medical equipment that keeps you alive, the sports you watch, the bicycles and automotive luxuries you have, the camping gear you use, and the chair you place your butt in to make such asinine bills like this one comes from the very thing you are claiming is dangerous. Really think about how ignorant that is.

Senator Golden you are from Ashland and it's clear you have no earthly idea of how rural areas of Oregon are the the most sustainable and a benefit to the climate. How can someone such as yourself push legislation that affects the whole state. It is clear you are pushing the United Nation's sustainable goals for 2030 which are communist in nature. You took an oath and are in breach of that oath Senator. You should NOT be the chair of Natural Resources as it's a clear conflict of interest. **KILL THIS BILL IMMEDIATELY!**
