

Submitter: Conan Fuerte

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB803

SB 803 should be tabled and not considered for any further legislative actions due to facts at hand; 1. There exists no current stable infrastructure too offset such a drastic action in concerns of the type of energy being consumed currently. 2. The time table being presented for this legislative action is not significantly supported with evidence that the population of the state would not suffer great financial and physical burdens from this legislative action.
