

Submitter: Dave Anolik

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB895

As an avid cycling enthusiast and a board member of Shift Community Cycles here in Eugene, I strongly support this bill. The isolating properties of a car interior combined with hand-held technological distractions makes it easy to accidentally hit a cyclist with a car when passing. I believe the adoption of this bill will help bring awareness to car drivers of the hazards experienced by cyclists, resulting in more drivers “seeing” cyclists. Fundamentally, I believe this bill will save lives. Thank you.
