

Submitter: Derek Ghan

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

I am writing in support of the proposed amendment to SB 85. Factory farms have repeatedly proven to be detrimental to public health and safety for surrounding communities as well as harmful to the environment. Until stricter regulations and better enforcement mechanisms are put into place, it's vital that Oregon does not issue or renew any licenses for industrial confined animal feeding operations.
