

Submitter: Jim Hartman
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB854

Honorable Oregon Senators,

Climate Change is an existential threat to our civilization and we need to have every aspect of our society do its part to meet this challenge. This is what the best science tells us.

Climate change is also a chance for us to rise to the challenge and do something great. Passing this bill is one of many things we need to do to provide our children with a livable future. It's doable, but we need to step up now. Our kids are going to be living with challenging climate change their whole lives. Everything we do matters. Every degree matters.

Sincerely,

Jim Hartman
