

Submitter: Leslie Harper

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: SB85

Animals in factory farms are suffering while our food quality is declining. I have taken a vow to support the welfare and kind treatment of animals. Factory farms have no place in our future! Higher greenhouse gas emissions, water pollution, and horrible working conditions alongside of animal abuse is NOT the way forward for Oregon. Please remember that you have a sacred duty to our children's children and that you have a moral obligation to consider the consequences of each of your decisions for Seven Generations. Be sure that your legacy is one that your descendants will be proud of. Otherwise we may not have a chance as a people.
