

Submitter: Valerie Baker

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB2904

It has long been demonstrated that the Primate Research Center of Oregon has been failing in their responsibility to remediate and report actions that have resulted in the death and suffering of animals under their care. Without enough oversight, it appears that this will likely continue, leading to further unnecessary harm and suffering of these animals. Please pass this bill.
