

Submitter: Annette Brainard

On Behalf Of:

Committee: House Committee On Early Childhood and Human Services

Measure: HB3256

HB3256, Parents should have a right to know what is happening with their children and be kept informed. They should also be able to choose and have input what is best for their children as long as it does not put children in danger and causes lasting damage which can happen in our society today whether in government care or guardian care.
